FIRE INDIA FOR A SAFER TOMORROW

ABOUT FIRE INDIA

Fire India is South Asia's largest and most influential fire and safety exhibition and conference. Entering its 21th edition in 2027, the event continues its mission to drive innovation, collaboration, and preparedness in fire protection, and life safety. It brings together top industry leaders and stakeholders, policymakers, and safety professionals under one roof to shape a safer future.

HISTORY OF FIRE INDIA

Established in 1994, Fire India has grown into the leading business platform for the fire and safety community. Over the decades, it has been hosted in major cities across India and has consistently showcased world-class technologies and solutions in fire safety and emergency management. With each edition, the event has expanded its global footprint and industry impact.

WHY EXHIBIT AT FIRE INDIA?

- **Reach the Right Audience** - Engage with a powerful mix of business buyers (B2B), end-users (B2C), and government agencies (B2G)—all under one roof.
- **Expand Your Business Network** - Meet potential distributors, partners, and clients from across India and abroad. Build strong relationships that lead to long-term growth.
- **Generate Quality Leads** - Attract serious buyers and industry professionals actively looking for reliable safety and fire protection solutions.
- **Access Government & Institutional Buyers** - Connect with fire brigades, defense, and procurement officials from central and state departments.
- **Launch New Products** - Introduce your latest innovations to a targeted audience, get immediate feedback, and boost brand visibility.
- **Stay Ahead of Industry Trends** - Understand market demands, competitor activity, and upcoming technologies through direct interaction with stakeholders and peers.

EXHIBITOR PROFILE

Fire India invites companies from the following domains:

- | | |
|---|--|
| • Smart Fire Detection & Alarm Systems | • Systems |
| • Evacuation & Emergency Lighting Solutions | • Smoke Control & Ventilation Solutions |
| • Fire & Rescue Vehicles | • Drone & Robotics for Fire & Rescue |
| • Personal Protective Equipment (PPE) | • Security & Surveillance Technologies |
| • IoT & AI-Based Safety Solutions | • Fire Safety Software & Simulation Tools |
| • Communication & Command Control Systems | • Industrial & Hazard Management Solutions |
| • Gas Detection & Suppression Systems | • Certification Bodies, Consultants & Associations |
| • Hydrant & Sprinkler | • Government & Regulatory Agencies |

VISITOR PROFILE

The show attracts a comprehensive mix of professionals, including:

- | | |
|---|--|
| • Fire Safety Professionals | • Academic and Research Professionals |
| • Emergency Responders | • Health and Safety Officers |
| • Building Managers and Facility Managers | • Construction and Real Estate Developers |
| • Disaster Management Experts | • Environmental and Sustainability Specialists |
| • Safety Consultants | • Ministry of Defense & Transport |
| • Regulatory and Compliance Officers | • Government and Regulatory Bodies |
| • Government Officials | • Environmental and Sustainability Solutions |
| • Insurance and Risk Management Professionals | |
| • Fire Engineers and Technicians | |

CO-LOCATED EVENT

SafetyEx unites diverse industries under one roof, presenting cutting-edge safety equipment, services, and solutions across power, oil and gas, construction, and healthcare, making it the ultimate platform for advancing safety standards..

KEY FEATURES

INNOVATION ZONE

A dedicated platform for exhibiting brands to showcase their latest fire and safety innovations and put new ideas in the spotlight. Participate in the exhibition and let your innovation lead the way!

STARTUP ZONE

A launch platform for new and emerging startups to display innovative fire safety solutions, gain exposure, attract partners, and connect with industry leaders and potential customers.

TECHNICAL CONFERENCE

Attend informative sessions led by experts on the latest trends, technologies, safety regulations, and real-life case studies shaping the future of fire safety and emergency response.

DEMOex

Showcase your innovations where it matters most—in action. Demonstrate how your advanced fire and rescue technologies perform in real-life emergency scenarios and highlight their true impact on safety.

WHY MUMBAI?

Mumbai is the ideal location for Fire India due to its strategic importance as India's commercial capital. With world-class infrastructure, major ports, and international airports, Mumbai offers seamless connectivity, making it accessible to a global audience. The city serves as a hub for industries such as manufacturing, construction, and energy, all of which have a growing demand for advanced fire safety solutions. Additionally, Mumbai's vibrant market provides exhibitors with vast opportunities to engage with industry leaders, government bodies, and potential partners, making it the perfect setting for networking and business growth at Fire India.

VENUE INSIGHTS

The Fire India will be conducted in Bombay Exhibition Centre (BEC), Goregaon, Mumbai. It is one of India's premier and largest exhibition venues. It is well-connected by road, rail, and air, offering convenient access from both Mumbai's domestic and international airports. BEC spans across over 45,000 square meters of covered exhibition area, equipped with state-of-the-art infrastructure, including spacious air-conditioned halls, meeting rooms, and modern amenities to accommodate large-scale exhibitions, conferences and corporate events. Its central location and world-class facilities make it an ideal destination for international exhibitors and visitors alike.

- The Chhatrapati Shivaji Maharaj International Airport is located 6.6 Kms from Bombay Exhibition Centre.
- The Mumbai Central Railway Station is located 24.8 Kms from the Bombay Exhibition Centre.
- Goregaon East Metro Station is the nearest Metro Station and is located 650 meters away from the Bombay Exhibition Centre.

FIRE INDIA CONFERENCE

The Fire India Conference is a key knowledge-sharing platform featuring expert speakers, panel discussions, and case studies. It covers critical topics like fire prevention, smart safety systems, disaster response, and regulatory updates. The conference offers valuable insights for professionals, government bodies, and industries working to improve fire safety and emergency preparedness.

ABOUT IFE (INDIA)

The Institution of Fire Engineers (India), founded in 1973, is a distinguished professional body dedicated to enhancing the science and practice of fire engineering in India. It plays a key role in training, standardization, and collaboration efforts, making it an integral co-organizer of the Fire India Conference.

Founded 1973

ABOUT FPAI

Established in 2000, the Fire Protection Association of India (FPAI) represents the fire safety industry and promotes awareness, training, and global collaboration with key national and international bodies.
